Office Action Summary

PART III: REASONS FOR REJECTIONS AND OBJECTIONS

The specification is objected to under 37 CFR 1.71 as failing to adequately teach how to make and/or use the invention, i.e. failing to provide an enabling disclosure. The specification does describe the process of "performing business logic on such data" as cited in claim 1. The specification makes no mention of "business logic" whatsoever.

Claims 1-11 are rejected under 35 USC 112, first paragraph, for the reasons set forth in the objection to the specification.

The following is a quotation of the appropriate paragraphs of 35 USC 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

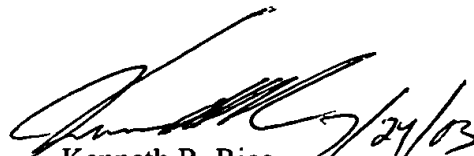

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-8, 10 and 11 are rejected under 35 USC 102(b) as being clearly anticipated by Ludwig et al.

Claims 1-11 are rejected under 35 USC 102(e) as being clearly anticipated by Gershman et al.

Claims 12-17 are rejected under 35 USC 102(b) as being clearly anticipated by Cameron et al.
